I can apply my knowledge of flowering plants to design a new species.

1. **Create** a new species of flowering plant.
2. **Draw and label** a diagram of your created flowering plant to show its parts, their role and the method of pollination and seed dispersal.

Name: Hawkslion
Method of pollination: Insects (butterflies)
Method of seed dispersal: Bursting

Seeds burst from here

Brightly coloured petals to attract insects to pollinate

Stamen (anther and filament)

Stigma
